Systems (1999)

GE Managerial Awards (1985, 1979)

Dwighd Delgado has spent more than four decades starting up, turning around, and growing technology manufacturers at home and abroad. At eight organizations with revenues from \$5 million to \$1 billion, he has led multicultural teams of up to 320 and delivered more than \$14 million in cost productivity.

Dwighd founded **Strategic Operations Solutions, LLC® (SOS®)** in 2000. As its Master Operations Troubleshooter, he helps manufacturers align **Strategy**, **Best Practices**, and the **Right People** for clients across North America, Europe, and Asia. As an Account Manager for the Maryland Manufacturing Extension Partnership (2014–2016), he led multiple engagements across six Maryland counties, reporting more than \$5 million in economic impact.

He began his career at General Electric, advancing into middle management at the interface of marketing, engineering, and manufacturing at GE Lighting and GE Ceramics. There he turned around a \$10 million technology transfer with CKD in Japan, managed a \$15 million transfer that generated \$40 million in incremental revenue, and started up a manufacturing operation in Mexico. At Spectris plc and Fusion, he held separate Vice President roles in Operations and Strategic Sourcing, built the manufacturing organization behind Fusion UV Systems' growth from \$17 million to \$84 million, played a key operational role in its 1994 IPO, and saved 200 jobs at Brüel & Kjær Vibro in Germany.

He later led turnarounds at private manufacturers, including Janos Technology, where EBITDA rose 57.5% ahead of a nine-figure liquidity event and Fortune 250 acquisition, and PremaTech Advanced Ceramics. He co-founded and served as president of Strategic Path and Engineering, Inc., a private startup and turnaround firm.

A former Adjunct Professor of Lean Six Sigma at Quinsigamond Community College, Dwighd has served on corporate, nonprofit, and higher-education advisory boards in Maryland and Massachusetts. Since 2018 he has been Chief Experience Officer of CEO Experience, which helps Christian CEOs develop their leadership teams, and he launched a grant-funded ESOL community program.

A private pilot with an instrument rating, a sailor, and a lifetime member of the U.S. Chess Federation, Dwighd is bilingual in English and Spanish.
